[CLAIMS]

- 1. An ink jet recording element comprising a support and an ink receiving layer wherein said ink receiving layer comprises (a) a pigment, (b) a silanol modified polyvinyl alcohol, and (c) a film-forming polymer having a glass transition temperature T_{σ} lower than 50 °C.
- An ink jet recording element according to claim 1 wherein said pigment is a porous inorganic pigment.
- An ink jet recording element according to claim 2 wherein said porous inorganic pigment is a silica.
- An ink jet recording element according to claim 1 wherein said silica is an amorphous silica having an average particle size between 1 μm and 15 μm.
- 5. An ink jet recording element according to claim 1 wherein said silanol modified polyvinyl alcohol has a silanol modification degree between 0.1 % and 10 % and a viscosity of a 4% aqueous solution between 1 and 25 mPa.s.
- 6. An ink jet recording element according to claim 1 wherein said film-forming polymer having a T_α lower than 50 $^\circ\text{C}$ is a latex.
- 20 7. An ink jet recording element according to claim 6 wherein said latex is a copoly(styrene-butadiene) latex.
 - An ink jet recording element according to claim 6 wherein said latex is an acrylate latex.
 - An ink jet recording element according to claim 1 wherein said ink receiving layer further comprises a cationic substance.
 - 10. An ink jet recording element according to claim 9 wherein said cationic substance is a poly(diallyldimethylammonium chloride) or a dimethylamine-epichlorohydrine copolymer.

10

- 11. An ink jet recording element according to claim 1 wherein said element further comprises an adhesive undercoat layer containing an adhesive polymer between said support and said ink receiving layer.
- 12.An ink jet recording element according to claim 11 wherein said adhesive polymer is a copoly(styrene-butadiene) latex.
 - 13. An ink jet recording element according to claim 11 wherein said adhesive polymer is an acrylate latex.
 - 14.An ink jet recording element according to claim 13 wherein said acrylate latex is ethylacrylate-hydroxyethylmethacrylate copolymer.
 - 15. An ink jet recording element according to claim 11 wherein said adhesive polymer is a vinylester latex.
 - 16.An ink jet recording element according to claim 1 wherein said support is an opaque support.
